CAREER SUMMARY

BS Information Technology graduate with hands-on experience in **technical support** and **web development**. My background includes troubleshooting PC systems, maintaining hardware infrastructure, and building functional websites from the ground up. I work best when there is a clear goal to hit and I make sure to go through every step properly to get there.

TECHNICAL SKILLS

IT Support: PC Maintenance, OS Installation (Windows), Software Deployment, Hardware Diagnostics, Technical Documentation, Printer and CCTV basic troubleshooting.

Web Development: HTML5, CSS3 (Tailwind, Bootstrap), JavaScript, PHP, MySQL, Firebase, basic React.

Product & Design: UI/UX Design (Canva/Figma), System Architecture, Database Schema Design.

Tools & Platforms: GitHub, VS Code, Google Workspace, MS Excel, AI Prompt Engineering.

WORK EXPERIENCE

Transfer It

March 2025 – May 2025

IT & Operations Intern

- Assisted with PC reformatting, OS installations, and deployment of company-standard apps and security software across branch computers.
- Provided technical support for the Office of the President department, relaying and documenting branch issues, remotely resolving driver problems, and tracking what was fixed.
- Learned CCTV components and assisted with basic assembly and parts replacement.
- Researched and tested a subscription-based AI design tool weekly, presenting findings and real company use cases every Friday through PowerPoint reports to support the CEO's push for workflow automation.

PROJECT EXPERIENCE

Best Aluminum Sales Corps. Integrated Systems

Oct 2024 – Jan 2025

Lead Developer

- Built a web-based inventory system where staff log stock ins from orders and outs from sales in one place, making discrepancies easier to trace.
- Developed a dashboard for admin and inventory manager roles showing stock levels, low stock alerts, and full movement history.
- Handled the full system solo including database design, backend logic, role-based access, and frontend interfaces.

EARIST CSS Department Freshman Screening Website

Sep 2024 – Dec 2024

QA & Debugger

- Joined the planning stage where the team mapped out the full system flow and features together.
- Fixed PHP errors, corrected database logic, and patched broken login flows to help stabilize the system before submission.

EDUCATION & CERTIFICATION

Eulogio “Amang” Rodriguez Institute of Science and Technology

Batch 2021 - 2025

Bachelor of Science in Information Technology

- Graduated with a GWA of 1.565
- NC II – Computer System Servicing (TESDA) Certified
